Section I:
AMENDMENT UNDER 37 CFR §1.121 to the
CLAIMS

Claim 1 (currently amended):

A method for organizing ~~and presenting information from a client account database, and for preparing briefing packages for presentation to a sales account executive regarding client business entities managed by said sales account executive for sales account executives, said database storing a plurality of client records each containing data or links to data relating to a different customer, said method comprising the steps of:~~

storing a plurality of client records relating to one or more client business entities, each client record containing a plurality of fields in at least one client account database, at least one of said fields containing a link to data, documents or information external to said database;

parsing a portion of an electronic mail message according to a predetermined format to determine a client record to which the message is to be linked;

integrating information to form a briefing package by linking said electronic mail message and at least one other external data item to at least one client record, said other external data item being selected from the list of a stock share price quote server, a business plan document, a marketing strategy document, a note from a previous meeting with said client, a previously presented presentation document and an action item list;

subsequently showing a first set of information for a selected client account on a main screen view on a user display by selecting an client record associated with a specific client business entity; and

providing in said first set of shown information one or more user-selectable expandable subforms [[and]] , wherein at least one subform retrieves and shows at least one of said linked external data items when expanded.

Serial No. 09/735,444

Claim 2 (currently amended):

The method as set forth in Claim 1 wherein said step of ~~showing a first set of information comprises showing an physical address for a selected client account~~ parsing a portion of said electronic mail message according to a predetermined format comprises parsing a subject field for a client name indicator.

Claim 3 (currently amended):

The method as set forth in Claim 1 wherein said step of showing a first set of information comprises showing a stock share trading symbol for a selected client account.

Claim 4 (canceled).

Claim 5 (currently amended):

The method as set forth in Claim 1 wherein said step of providing ~~user-selectable hyperlinks~~ comprises providing at least one hyperlink to a word processor document.

Claim 6 (canceled).

Claim 7 (currently amended):

The method as set forth in Claim 1 wherein said step of providing ~~user-selectable hyperlinks~~ comprises providing at least one hyperlink to a computer-readable presentation file.

Claim 8 (currently amended):

The method as set forth in Claim 1 wherein said step of providing ~~user-selectable hyperlinks~~ comprises providing at least one hyperlink to an action item list.

Serial No. 09/735,444

Claim 10 (currently amended):

A computer process comprising a computer program embodied in a computer-readable medium for organizing and presenting information from a client account database, and for preparing briefing packages for presentation to sales account executives, said database storing a plurality of client records each containing data or links to data relating to a different customer, said computer program performing steps comprising being performed on or with aid of a computer and including:

storing a plurality of client records relating to one or more client business entities, each client record containing a plurality of fields in at least one client account database, at least one of said fields containing a link to data, documents or information external to said database;

parsing a portion of an electronic mail message according to a predetermined format to determine a client record to which the message is to be linked;

integrating information to form a briefing package by linking said electronic mail message and at least one other external data item to at least one client record, said other external data item being selected from the list of a stock share price quote server, a business plan document, a marketing strategy document, a note from a previous meeting with said client, a previously presented presentation document and an action item list;

(a) first code means for causing the computer to show subsequently showing a first set of information for a selected client account on a main screen view on a user display by selecting an client record associated with a specific client business entity; and

(b) second code means for causing the computer to provide user-selectable hyperlinks and expandable subforms to additional information for said selected client account:

providing in said first set of shown information one or more user-selectable expandable subforms, wherein at least one subform retrieves and shows at least one of said linked external data items when expanded.

Serial No. 09/735,444

Claim 11 (currently amended):

The computer process program as set forth in Claim 10 wherein said ~~second code means which provides user-selectable hyperlinks~~ program for retrieving linked external data items comprises program for showing ~~code means for causing the computer to show~~ word processor files.

Claim 12 (currently amended):

The computer process program as set forth in Claim 10 wherein said ~~second code means which provides user-selectable hyperlinks~~ program for retrieving linked external data items comprises program for showing ~~code means for causing the computer to show~~ computer-readable presentation files.

Claim 13 (currently amended):

The computer process program as set forth in Claim 10 wherein said ~~second code means which provides user-selectable hyperlinks~~ comprises ~~code means for causing the computer to show~~ Rich Text Format information program code for parsing a portion of said electronic mail message comprises parsing a subject field for a client name indicator.

Claim 14 (canceled).

Claim 15 (currently amended):

The computer process program as set forth in Claim 10 wherein said ~~second code means which provides user-selectable hyperlinks~~ program for retrieving linked external data items comprises program for showing ~~code means for causing the computer to display a~~ stock share quote for a selected client company.

Claim 16 (canceled).

Claim 17 (currently amended):

A system for organizing information and presenting executive briefing packages ~~information from a client account database, and for preparing briefing packages for sales-~~
~~account executives, said system comprising:~~

a storage device for storing a plurality of client records, said client records each containing data or links to data relating to a different customer and each record containing a plurality of fields, at least one of said fields containing a link to data, documents or information external to said database;

an email parser configured to parse a portion of an electronic mail message according to a predetermined format to determine a client record to which the message is to be linked;

a first program code means ~~executable by a database server computer for~~ integrating and showing a first set of information for a selected client account on a main screen view on a user display, said integrating information forming a briefing package by linking said electronic mail message and at least one other external data item to at least one client record, said other external data item being selected from the list of a stock share price quote server, a business plan document, a marketing strategy document, a note from a previous meeting with said client, a previously presented presentation document and an action item list ; and

a second code means ~~executable by a database server computer for providing~~ user-selectable expandable subforms and hyperlinks to additional information for said selected client account, wherein at least one subform retrieves and shows at least one of said linked external data items when expanded.

Claim 18 (original):

The system as set forth in Claim 17 wherein said second code means comprises code means for causing the computer to show word processor files.

Serial No. 09/735,444

Page 8 of 16

Claim 19 (original):

The system as set forth in Claim 17 wherein said second code means comprises code means for causing the computer to show computer-readable presentation files.

Claim 20 (currently amended):

The system as set forth in Claim 17 wherein said ~~second code means comprises code means for causing the computer to show Rich Text Format information~~ email parser is further configured to parse a subject field of said electronic message for a client name indicator .

Claim 21 (original):

The system as set forth in Claim 17 wherein said second code means comprises code means for causing the computer to show biographical information concerning at least one employee of a selected client company.

Claim 22 (original):

The system as set forth in Claim 17 further comprising a remote access communications interface for providing access to said database via a computer network, and for showing said first set of information for a selected client account on a remote computer display.

Claim 23 (canceled).
